

THE FUTURE OF WATER IN LA

Project Schedule

November 2021 –
December 2022

Work Hours

9:00 AM – 5:00 PM
Monday-Saturday

Region

Council District 11

Speedway ERDIP Water Pipeline Project

Project Description

The Speedway Earthquake Resistant Ductile Iron Pipe (ERDIP) Project is a water system infrastructure improvement project that will improve the reliability of the water system and provide fire protection capacity.

The project will replace 10,500 linear feet of 6-inch and 8-inch diameter cast iron pipe with 6-inch and 8-inch diameter earthquake resistant ductile iron pipe along Speedway between 17th Avenue and Barnard Way.

As an essential services provider, LADWP is working to ensure water service reliability during the COVID-19 response while practicing recommended health and safety measures to protect our employees and the public.

Construction Information

Construction for this pipeline installation is scheduled to begin in November 2021 and is expected to be completed by December 2022.

LADWP construction crew will install the mainline in four phases to minimize traffic impacts to the community. The first phase will be on Speedway from 17th Avenue to Club House Avenue. Once each phase is completed the crew will then move to the next phase. For all 4 Phases, traffic will be detoured to Pacific Avenue.

Parking will be restricted during construction hours and will be available as the crew completes paving over the trench. Business along the construction zone area will be notified 3 working days prior to the start of construction.

Project Schedule

Phase 1:

November 2021 – February 2022

Phase 2:

February 2022 – May 2022

Phase 3:

May 2022 – August 2022

Phase 4:

August 2022 – December 2022
